

### Day 1: FP essential

#### Module 1: Function

- First class functions
- Recursion, Lazyness
- Pure functions

#### Module 2: Side Effects

- How to control effects
- Thunk / IO
- Async

### Day 2: Errors

#### Module 3: Error Handling

- How to safely deal with runtime errors
- Compare error types: Option, Try, Either

### Module 4: Types

- Unrepresentable state
- Cardinality
- How to measure the impact of types and tests

# Out of scope

How to build a complete FP application

Library specific API

Scala/JVM low level optimisations

## Course format

# Schedule for today

09.00 Start morning session

10.30 Break 15 min

12.15 Lunch Break

13.15 Start afternoon session

14.30 Break 15 min

16.00 Break 15 min

17.15 Wrap-up
